Sergio Esteban Adán

Cloud Architect (AI Team)

Greater Madrid Metropolitan Area

Summary

I am a person who loves automations. After working on many technologies, cloud is my passion.

Experience

Sngular

Cloud Architect (AI Team)

December 2019 - Present (2 years 4 months)

Madrid y alrededores

At Sngular, I'm working on the AI team, supporting the infrastructure section of the team. I am responsible for the Cloud architecture of the team's projects, including AWS (mainly), GCP and Azure.

I am developing services written in Python, and managing and automating the infrastructure of international projects using Serverless Framework, Sceptre and Cloudformation in AWS. I lead all the scrum ceremonies of those projects too.

Stack: AWS, Serverless Framework, Sceptre, Cloudformation, Terraform, GCP, Azure, Python, Angular, Docker, Kubernetes, Gitlab CI, Jira, Gitlab

BABEL

Full-Stack Developer (24x7 Support) in ING

February 2018 - December 2019 (1 year 11 months)

Madrid y alrededores, España

I joined ING a few months before the launch of the ING platform in the Czech Republic. For a few months I was learning how it was developed and how it worked. After a few weekend simulations, I helped and supported the entire Go Live process for a whole weekend, with good results. Later I was working in the 24x7 support team of the application, giving support to the entire application stack (except banking core): frontend, backend, database, communications, architecture, call center application...

Stack: Spring, Javascript, Oracle, Jenkins, Ansible, Linux (Red Hat), Bash, RabbitMQ, Git, Jira, Scrum, Spotify methodology

MOBALOO

Full Stack Developer

October 2016 - February 2018 (1 year 5 months)

Alcalá de Henares y alrededores, España

At Mobaloo, I was developing the main application of this Marketing company, with Yii2 (PHP Framework). The application was in charge of comparing thousands of CPI offers and selecting the best ones. I was developing the complete stack, frontend, backend, database, infrastructure (AWS) and other secondary tools of the company. In the final phase, I was in charge of managing and estimating the sprints.

Stack: PHP, Yii2, MySQL, AWS, Go, Python (Web Scrapping)

Indra

Systems Technician

March 2013 - June 2013 (4 months)

Torrejón de Ardoz

At Indra, I was working in the deployment department of the Spanish air traffic controller application. In these few months, I was managing on prem Red Hat servers and migrating and configuring the entire network in the simulation environment.

Stack: Red hat, Cisco, bash

Education

Universidad de Alcalá

Degree in Information Systems, Management Information Systems · (2013 - 2016)

IES Valle Inclán

Higher Technician in Administration of Computer Network Systems, Management Information Systems · (2011 - 2013)
